

The Interkal Quality vs. The Hussey Compromise

Recoverable Seating

A Detailed Comparison:

Interkal Double Recoverable Notch shown here

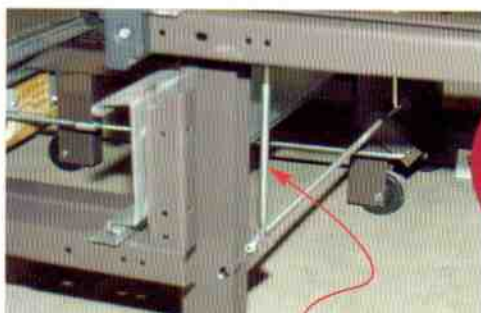

Hussey Compromise:
Cables have excessive slack and exposed lead splices can easily fail.

Interkal Quality:
Heavy-Duty Engagement Rod Linkage provides positive engagement at both front and rear, resulting in a highly durable and reliable system.

Hussey Compromise:
Cables are laced up and around steel components, making them susceptible to binding or breaking.

Interkal Quality:
Continuous Vertical Engagement Rods provide positive engagement into the continuous locking angle at both front and rear.
