SEATING CONCEPTS

The Helix Seat

The Helix chair model is a versatile and affordable option from Seating Concepts. It's entirely customizable, and it can also be utilized in a wide range of settings. From auditoriums, theatres, lecture halls, and churches or places of worship, cinema seating, the Helix is an

excellent choice. Providing the strength of a robust steel support system, exclusive cold molded back and foam cushions, and easy to maintain components, the Helix is a seating product that

extends extraordinary performance event after event. With the Helix, you'll be able to choose between various upholstery options, finishes and accessories. The counterbalance mechanism keeps the Helix operating quietly and properly for its full life, and the chair offers superior comfort at a reasonable price. With various size options, the Helix can always fit into the space you're working with while matching your goals or needs for capacity.

Facility Feature: West Chicago ARC Center

The 70,000 square foot West Chicago ARC Center is looking fit and ready for users this fall. A variety of indoor park district programs and activities are currently planned for the facility in the upcoming months. The gymnasium at the ARC Center serves as one of the primary spaces in the facility. The gymnasium features 3 full-sized basketball courts

Partitioning divider curtains make it easy for the facility to host multiple sports or programs at once, bringing a wider group of users through the facility's doors.

with retractable ceiling-suspended hoops. Full court volleyball play is also easily accommodated on each primary basketball court. Electrically operated divider curtains separate each primary court space, creating partitions that allow for multiple programming opportunities in the gym. Wall and column protective pads complete the fringes of the gym space.

Each ceiling suspended basketball backstop was custom-designed to work within the facility space, while column protective pads were finished in field for a perfect fit.
